

Vertical Web-Collection Unit

The range of Crosrol vertical Web-collection units provide a replacement for the various models of 'horizontal' Web units fitted to previously supplied Crosrol Cards, the new units enabling significantly Higher Card production take-off speeds to be realized.

A pair of almost vertically mounted Web-collection belts provides a simplified material flow path enabling higher production take-off speeds.

The vertical web collection system considerably reduces sliver end breaks when compared to the original horizontal system the simplified fibre path reduces piecing waste and also contributes to an improved Sliver U% being achieved.

Parts included in the Change Kit: -

- Vertical Web-Collection Unit (fully assembled).
- Drive arrangement together with modified Sheet Metal panels if applicable.
- Full instructions on how to assemble the new High Speed Roller to your old Carding machine.
